Summary

User Experience and Interactive Design student with a foundation in web development and process automation. Skilled in translating complex workflows into simple, usable digital tools. Known for being detail-oriented, collaborative, and focused on practical, user-centered solutions. Eager to grow in a role where I can connect design thinking with real-world development.

Skills

Languages & Frameworks: HTML, CSS, JavaScript, React, Angular, C#, Next.js.

Tools: Figma, Git, Jira, Confluence.

Soft Skills & Methods: Responsive design, accessibility basics, documentation, Agile methodology, collaboration, problem-solving, attention to detail, adaptability, user-focused mindset.

Academic Projects

OpenWay - Accessibility Map App

- Designed and tested personalized routing and accessibility filters to improve navigation in Vancouver.
- Conducted competitor analysis and usability testing, refining navigation and content structure.

Festival Hopper - Festival & Concert Planning App

- Built an app concept to help users discover, track, and purchase tickets for festivals.
- Created user personas, information architecture, and prototypes; usability tests validated ease of checkout and ticketing.

Bee the Chef - Meal Planner App

- Designed a mobile app promoting healthy and affordable eating with local ingredients.
- Led user research, usability testing, and iterative design to refine recipe, meal plan, and grocery flows.

Professional Experience

Itaú Unibanco - Sao Paulo, Brazil

Tech Lead   Sep/2022-Mar/2024

- Led a team of 5 developers across 3 projects, boosting delivery speed by 20% through concise meetings and upfront alignment with business goals.
- Implemented process improvements in internal documentation, making it easier for teams to find information and reducing recurring support requests by 10%.

Tech Analyst   Jan/2021-Aug/2022

- Supported 10-20 internal teams weekly with documentation, API usage, and infrastructure needs, collaborating with solution architects and DBAs.
- Maintained onboarding materials and improved launch guides, reducing support delays by 10%.
- Collaborated with senior developers and UX designers to refine workflows and internal dashboards.

Web Developer   Oct/2018-Dez/2020

- Developed and maintained internal tools using Angular and C#.
- Reduced manual processing by 30% by designing a checks portal feature that combined data from multiple APIs into complete check records.
- Conducted user interviews and translated requirements into wireframes and user flows.

Volunteer Experience

Vancouver Startup Week & Vancouver Cloud Summit (2025)

- Helped attendees exchange event items at the trading booth while providing directions and maintaining a welcoming atmosphere.
- Greeted and checked in attendees, helping with setup and backstage tasks.

Education

Diploma in User Experience and Interactive Design   2024-Present

Canadian College of Technology and Business (CCTB) - Vancouver, Canada

MBA in Full Stack Development - Design, Engineering & Deployment   2022-2023

Faculdade de Informática e Administração Paulista (FIAP) - Sao Paulo, Brazil

Bachelor's Degree in Chemical Engineering   2013-2019

Universidade Federal de São Paulo (UNIFESP) - Sao Paulo, Brazil
